Professional Summary

Accomplished **Ethical Hacker, Red Team Operator, and Cybersecurity Trainer** with 6+ years of hands-on offensive security expertise.

Specialised in adversarial simulation, vulnerability assessment, penetration testing, and AI-specific security research. Successfully trained 500+ corporate professionals and university students in practical, exploit-driven laboratory environments. Founder of **RATAN OS v1.0** — a lightweight ethical hacking distribution. Committed to advancing cybersecurity through rigorous training, responsible disclosure, and continuous innovation.

Professional Experience

Ethical Hacker Trainer & Technical Security Manager

Appin Technology Lab · South Extension, New Delhi 2020 – 2026

- ◆ Trained 500+ students and working professionals in offensive security, vulnerability discovery, and hardened server deployment.
- ◆ Authored and delivered OWASP web-application security, Metasploit, Burp Suite and CTF training modules end-to-end.
- ◆ Executed high-value corporate ethical hacking workshops, lab build-outs and client vulnerability assessments.
- ◆ Directed red team challenges and bespoke attack-simulation scenarios to sharpen internal security departments.
- ◆ Engineered and released RATAN OS v1.0 — a lightweight ethical hacking operating system for field engagements.

- ◆ Developed **Ratan AI** (Ethical White Hat AI) for offensive security assistance and threat modelling.

Technical Security Executive

Corax Cyber Security Ltd

2018 – 2020

- ◆ Conducted VAPT and ethical hacking assessments on client networks and web applications.
- ◆ Monitored network security posture and implemented mitigation strategies.
- ◆ Prepared detailed security reports and training documentation for junior analysts.

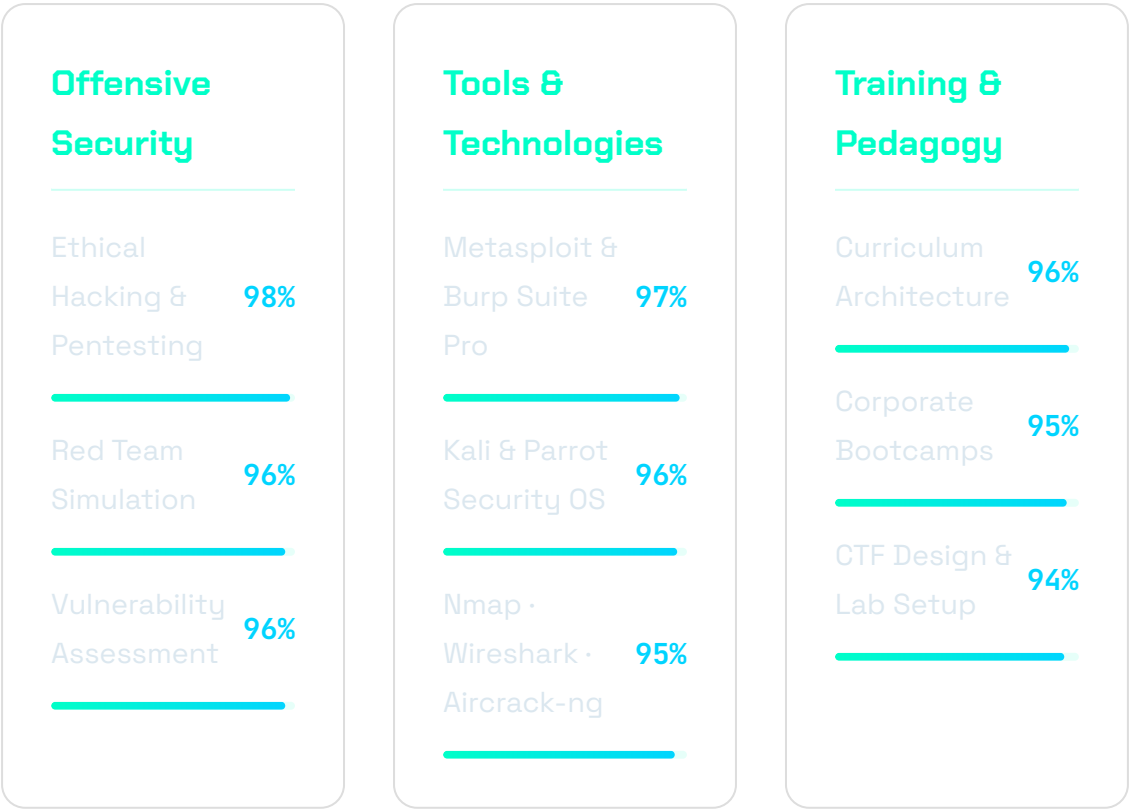

Ethical Hacking Trainer

Cyber Hunterz • Lucknow

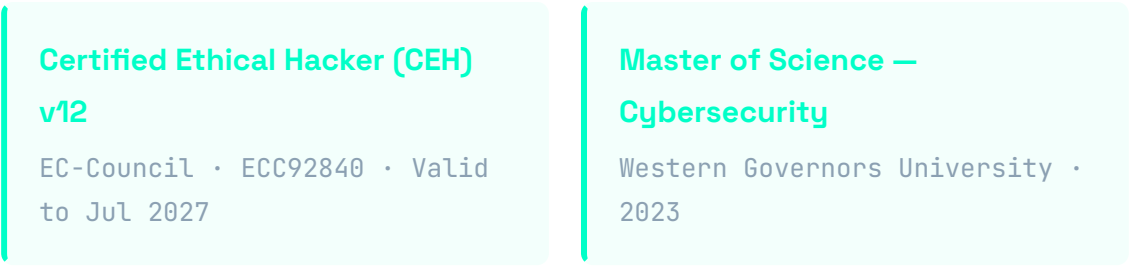

2014 – 2018

- ◆ Delivered practical ethical hacking and penetration testing training to corporate and academic cohorts.
- ◆ Designed custom curriculum aligned with industry best practices and emerging threat landscape.
- ◆ Mentored students in bug bounty hunting and exploit development methodologies.

PG Diploma — Computer Application

BTE, U.P. Lucknow • 2013 •
First Division

RATAN OS v1.0 — Self-Engineered

Lightweight Ethical Hacking
Distribution • 2026

Flagship Projects & Initiatives

RATAN OS v1.0 — Lightweight Ethical Hacking Distribution

A purpose-built, low-footprint operating system engineered from the ground up for offensive security practitioners. Includes pre-armed offensive toolkit, live-boot capability, USB persistence, and is optimized for field engagements and training labs.

Ratan AI (Ethical White Hat AI)

An AI-powered assistant designed specifically for ethical hackers and security professionals. Assists in threat modelling, exploit development, vulnerability research, and offensive security strategy.

Corporate Red Team Simulation Programs

Designed and executed high-value red team exercises for Fortune 500 companies and government agencies. Includes full-

scope attack simulations, post-engagement reporting, and remediation guidance.
